Investment Objective and Strategy

The Fund seeks to provide long-term growth of capital. The Adviser pursues the Fund's investment objective by investing primarily in equity securities of companies principally in countries represented in the S&P® Developed Ex-U.S. SmallCap Index. Under normal circumstances, at least 80% of the Fund's assets will be invested in securities of small capitalization companies. The Adviser's investment process uses a combination of quantitative and traditional qualitative, fundamental analysis to identify attractive stocks with low relative price multiples and positive trends in earnings forecasts, high profitability and companies with a strong or positively trending environmental, social, and governance ("ESG") profile.

About the Fund

- Normally invests in a minimum of ten countries.
- Has tight risk controls to mitigate unintended risk and highlight security selection as a key component of the overall portfolio construction.

Past performance does not guarantee future results. The performance quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.vcm.com. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Performance may reflect certain past fee waivers and/or expense reimbursements, without which performance would have been lower. High, double-digit returns are highly unusual and cannot be sustained. Investors should be aware that these returns were primarily achieved during favorable market conditions.

Morningstar Category: Foreign Small/Mid Blend. Morningstar ratings and rankings are based on the A share class.

Ratings and rankings are based on past performance, which is no guarantee of future results.

Star ratings do not reflect the effect of any applicable sales load. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures

associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Victory Capital Management Inc. has paid a standard fee to Morningstar for access to ratings data.

Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar ratings and rankings could have been lower. Ratings and rankings for other share classes may be lower.

All investing involves risk, including the potential loss of principal. The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, or changes in interest or currency rates. **International investments** can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from U.S. investments. Investments in **smaller companies** typically exhibit higher volatility. **Investments concentrated in an industry** or group of industries may face more risks and exhibit higher volatility than investments that are more broadly diversified over industries or sectors. Investments in companies in the **industrials sector**, including producers of durable goods and companies that process raw materials, may be adversely affected by changes in supply and demand for products and services, governmental regulation and changes in spending policies, world events and economic conditions. The portfolio is also subject to **liquidity risk**, which is the risk that the Adviser may not be able to sell a security at an advantageous time or price, which may adversely affect the portfolio. **Large shareholders**, including other funds advised by the Adviser, may own a substantial amount of the Fund's shares. The actions of large shareholders, including large inflows or outflows of cash, may adversely affect other shareholders, including potentially increasing capital gains. The value of your investment is also subject to geopolitical risks such as wars, terrorism, trade disputes, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies.
