FUND FACTS

Class	Inception Date	Ticker	Expense Ratio:	
			Gross	Net
Fund	07/31/08	URTRX	0.55%	0.55%

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through August 31, 2026.

Investment Style

Target-Date 2030

Investment Objective and Strategy

The Fund's investment objective is to provide capital appreciation and current income consistent with its current investment allocation, which is designed for investors planning to start withdrawing funds in or near the Fund's target date (2030). The Fund invests mainly in a selection of affiliated mutual funds and ETFs. The Fund's asset class mix will shift so that the Fund becomes more conservative over time. It is anticipated that at its target date, the Fund will be 35% invested in underlying funds that invest in stocks and 65% invested in funds that invest in bonds.

About the Fund

- A diversified portfolio in a single fund.
- For investors planning to begin withdrawals around the year 2030.

Portfolio Managers

Mannik Dhillon, CFA, CAIA. Since 2019.
Lance Humphrey, CFA. Since 2018.
Lela Dunlap, CFA. Since 2021.

Past performance does not guarantee future results. The performance quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.vcm.com. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Performance may reflect certain past fee waivers and/or expense reimbursements, without which performance would have been lower.

Growth of a Hypothetical \$10,000 Investment Fund Shares (3/31/2016–3/31/2026)

MORNINGSTAR RATINGS AND RANKINGS

	Overall	3 Year	5 Year	10 Year
Morningstar Rating	★★★★	★★★★	★★★★★	★★★
Morningstar Ranking (%)	—	23	9	72
# of Funds	181	181	176	115

Morningstar Category: Target-Date 2030. Morningstar ratings and rankings are based on the Fund share class.

Ratings and rankings are based on past performance, which is no guarantee of future results. Star ratings do not reflect the effect of any applicable sales load. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The

weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Victory Capital Management Inc. has paid a standard fee to Morningstar for access to ratings data.

Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar ratings and rankings could have been lower. Ratings and rankings for other share classes may be lower.

Lifestyle Transition Path

*Years to Retirement is the difference between the current year and the target date referenced in a Fund's name.

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

All investing involves risk, including the potential loss of principal. The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, or changes in interest or currency rates. **International investments** can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from U.S. investments. **Emerging markets** involve heightened risks related to the same factors as well as greater volatility, reduced liquidity, different governmental controls and taxation, and less diversified economies. **Fixed income securities** are subject to interest rate, inflation, credit, prepayment, and default risk. The bond market is volatile. **Bonds and bond funds** will decrease in value as interest rates rise and vice versa. **Credit risk** refers to the possibility that debt issuers may not be able to make principal and interest payments or may have their debt downgraded by ratings agencies. **High yield securities** may be more volatile, be subject to greater levels of credit or default risk, and may be less liquid and more difficult to sell at an advantageous time or price than higher-rated securities of similar maturity. The value of your investment is also subject to geopolitical risks such as wars, terrorism, trade disputes, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies.

The **S&P Target Date 2030 Index** is designed to represent a small, style-specific derived consensus of asset class exposure and glide path for target dates up to 2030. The index is designed to help defined contribution plan sponsors screen, select, and monitor appropriate target date funds.

The Morningstar percentile ranking is based on a fund's average annual total return (excluding sales charges) relative to all funds in the same category. The highest (most favorable) percentile rank is 1%, and the lowest (least favorable) percentile rank is 100%.
